Cybersecurity Portfolio: mustafamoin.netlify.app | Projects Portfolio: mustafamoinportfolio.netlify.app

PROFESSIONAL SUMMARY

Cisco Certified CyberOps Associate with hands-on experience in Security Operations Center (SOC) Tier 1 basics, network traffic and packet analysis, phishing detection, log analysis and Security Information and Event Management (SIEM) basics. Built a Python packet sniffer with Scapy in a Kali Linux lab and PhishingHunter Elite, a machine learning tool that checks URLs for phishing risk. Also builds secure web and mobile apps with AI-assisted development, using login security, role-based access and data protection. Looking for a SOC Analyst or Cybersecurity Analyst role to support threat detection and incident response.

TECHNICAL SKILLS

Security Operations: Network Traffic Analysis, Packet Analysis (TCP/IP), Threat Detection, Log Analysis, Incident Detection, Phishing Detection, SIEM Fundamentals, Endpoint Security Concepts

Security Tools: Kali Linux, Scapy, Wazuh (learning), VirusTotal, Google Safe Browsing, WHOIS

Networking: VLAN Configuration, Subnetting, Inter-VLAN Routing, DHCP, Basic Routing, Cisco Packet Tracer

Programming and Scripting: Python, JavaScript, TypeScript, SQL

Application Security: JWT, OAuth, OTP Verification, Role-Based Access Control, Row Level Security, Audit Logging

Development (AI-Assisted): React, React Native, Node.js, Express.js, Flask, FastAPI, MongoDB, PostgreSQL (Supabase), Docker, Git and GitHub

CERTIFICATIONS

- Cisco Certified CyberOps Associate (2025)
- Cisco Career Paths: Junior Cybersecurity Analyst, Network Technician, Introduction to Cybersecurity (2025)

PROFESSIONAL EXPERIENCE

Cybersecurity Intern, DevelopersHub Corporation **2026**

SOC Operations, Network Monitoring, Python Tooling

- Completed a hands-on cybersecurity internship on SOC Tier 1 basics, including traffic monitoring and incident detection.
- Built a packet sniffer in Python using Scapy in a Kali Linux lab to capture live network traffic (DNS, DHCP, HTTP, TLS) and filter it by protocol.
- Created a simple endpoint security simulation in Python, in an authorized lab, to learn how credential theft happens and how it can be detected.

Freelance Web and Mobile Solutions (AI-Assisted Development) **Present**

Self-Employed, Karachi, Pakistan

- Build web and mobile apps for clients using AI-assisted development tools, from requirements to deployment.
- Communicate with clients, write project documentation and manage deadlines independently.

SECURITY PROJECTS

PhishingHunter Elite v2.0: ML-Powered URL Risk Scoring Platform **2026**

Python, Flask, scikit-learn, MongoDB Atlas, Docker

- Built and deployed a web app and public REST API that gives each URL a risk score from 0 to 100, using 14 weighted signals and a Random Forest model.
- Connected Google Safe Browsing, VirusTotal and WHOIS, used a dataset of 31,564 URLs, and added MongoDB caching to reduce external API calls.
- Built an admin dashboard with Chart.js charts and a user feedback feature to track model mistakes.

SOHO Network Design and Simulation **2025**

Cisco Packet Tracer

- Designed and simulated a small office/home office network with VLANs, subnetting, inter-VLAN routing and DHCP. Tested connectivity and fixed routing and segmentation issues.

SECURE APPLICATION PROJECTS (AI-ASSISTED DEVELOPMENT)

SisGo: Women-Only Ride-Hailing Platform **2026**

React Native, Expo, TypeScript, FastAPI, Supabase (PostgreSQL)

- Built a ride-hailing app for women with three parts: a mobile app, a backend API and an admin panel.
- Secured it with phone OTP login, identity verification, role-based permissions, Row Level Security and audit logging.

TAYBEX: AI-Enabled Market Intelligence Platform **2026**

React, Vite, FastAPI, Python, Supabase (PostgreSQL), LLM APIs (Gemini, Groq, OpenAI)

- Built a live web platform that gives AI-assisted market insights using Large Language Model (LLM) APIs.
- Added subscription plans, an admin console, role-based access control and secure payment webhooks.

TripMate AI: AI-Powered Travel Planning Platform (Final Year Project) **2026**

React, TypeScript, Node.js, Express.js, MongoDB, Stripe

- Built a travel planning platform that uses LLMs (Groq, Gemini) to create itineraries and hotel recommendations.
- Added four user roles (traveler, hotel, vendor, administrator), JWT login, Stripe payments and an admin dashboard.

REGALIA: Fashion E-Commerce Platform **2026**

Node.js, Express.js, MongoDB, JWT

- Built an online fashion store with a customer storefront and a separate admin panel.
- Added JWT and bcrypt login security, OTP-based guest verification and automatic order confirmation emails.

OOP Master: Cross-Platform Mobile Learning App **2026**

React Native, Expo Router, TypeScript, Supabase

- Built a mobile app to learn Object-Oriented Programming, with lessons, quizzes, bookmarks, progress tracking and a C++ practice compiler.
- Added Supabase login (email, Google sign-in, password reset) and Row Level Security to protect user data.

EDUCATION

B.S. Computer Science, Indus University, Karachi **2026**

Languages: English, Urdu
